## Ideal Weather Condition For Real Sports Day Held Wed., August 1

Chinook Wins First Money In Cereal Ball Tournament  
H. Johnston Turns In Wonderful Performance  
On Mound--19 Strike outs

After being postponed on several occasions owing to the condition of the weather, the Cereal Sports Committee eventually picked out a day that was ideal for such an affair.

Perhaps there was not as large a crowd as was anticipated but a large number are off on vacation just now. However a fine program had been prepared for the day which included hard ball, soft ball, foot races and merry-go round for the children, with picture show and dance in the evening.

In the opening ball game Chinook took the measure of the Oyen nine in an uphill game by the score of 7-6.

Barbe started on the mound for the locals, but being a trifle wild and not as effective as usual was relieved by Brookman the score being 3-0 against him. Brookman allowed three runs on a wild pitch, the second on a walk and one on a hit, but pitched good ball to the finish. The final inning saw Chinook coming from behind to win by one run after a stirring rally.

In the final game Chinook shut out Consort 4-0 behind the brilliant pitching of Harry Johnston, who struck out nine teen men in seven innings and only allowed two men to reach second base. Only twenty five men faced Johnston in seven innings in this remarkable pitching performance.

### 20 Injured As Police Arrest "Rain Maker"

Rumanian Village Rises Up In Armed Wrath Over Jail ing of Sorcerer.

DRIDU, Rumania, Aug. 4—Residents of this sleepy little Rumanian village rose up in armed wrath here when police tried to arrest a sorcerer named Chiju, who said he could bring rain.

Such a battle followed the action of police in throwing the "rain maker" into jail that two persons were wounded and 20 were arrested when the mob rushed the town's antiquated "catlaboose."

Chiju, self-styled St. John, claimed he would terminate the drought that has been destroying the crops of farmers if he were paid \$200. A priest heard his claims, was skeptical and called the police.

### Ample Supply of Feed For Chinook

There will be plenty of feed to supply the demand for stock during the winter in the Chinook district.

The harvest has started but won't be in full swing until next week. The wheat crop is very disappointing as until about the middle of July a large crop was expected, but owing to extremely hot dry winds just when the wheat was in the filling stage, the yield has been greatly reduced.

### Hog Breeders Hear Address At Field Day

H. E. Wilson States Careful Feeding Important For Marketing

LACOMBE, Alta., Aug. 4—The Lacombe Experimental Station put on a field day for the Alberta Swine Breeder. Friday at which Supt. F. H. Reed introduced H. E. Wilson, livestock assistant, who spoke on the hog situation in Canada.

He said England had established a price high enough to encourage home production and that, in order to retain our hold on their market, we must keep the quality of our finished products up to the highest standards.

He said pigs should be handled in such a way that they would reach the market at six to six and a half months of age. As they grow older they tend to develop heavier shoulders and ribs and do not produce the Wiltshire sides required. High protein foods and mineral substances must be fed in connection with the common grains.

Dr. R. D. Sinclair, University of Alberta, gave a demonstration of types. In Denmark they have improvement clubs, he said. Here we have the advanced registry and the new pig testing scheme.

G. W. Muir, Dominion animal husbandman, Ottawa, said that Ottawa as well as others had discarded all breeds but yorkshires, for economic reasons. He considered the Lacombe institution, as ideally located for this work and rated its work as the very highest.

Hog grading was demonstrated by W. G. Dunsmore, Calgary stockyards grader.

### Peyton News

The last ball game and dance, until after "The Works all Done This Fall" was well attended at the Peyton school last Saturday.

Last Sunday a pleasant gathering assembled at the Peyton Bros farm in honor of their sister, Mrs. Morris, who has been visiting from the east the past month. Those present were: Mr. and Mrs. R. Peyton, Mr. and Mrs. J. Peyton, Mrs. Morris and two little daughters Messrs Felix, Richard, Leo Bernard and Mark Peyton, Miss Julia Peyton, Burnard Brophy and Misses Louise and Ruth Robinson.

A number of people were entertained at the Hobson home on Sunday.

In this district harvest is wending, farmers are bending, housewives tending—all for a crust of bread.

Many of the well worn jokes on the medical profession lack solid basis, but the one about leaving the surgical sponge inside the patient has just been verified. Warden Lawes of Sing Sing prison was operated on Saturday for a tumor. Instead, the surgeons found a sponge which had been overlooked in a previous operation.

## To Stimulate Objective Thinking

The topsy-turvy condition in which the world finds itself to-day, naturally leads to serious thought on the part of everyone. Why should there be so much penury and want in the midst of a surplus of commodities. What are the real causes of stagnation of trade the world over. One hears that the capitalist system is doomed, and out of the present chaotic conditions a new order is bound to be established. Many theories are being continually advanced, designed to produce a new Utopia. The history of the world establishes the fact that all reforms necessarily come slowly. There can be no rapid realization of many obviously needed changes in our social system. But the world does not stand still, a forward and not a backward movement is inevitable. The encouragement and not the suppression of constructive thinking and expression of thought would be of material assistance. In the annual address of Principal Fyfe of Queen's University, reference was made to the stimulation of thought by means of discussions in the class rooms. He is reported in part as follows:

"In our academic seclusion we sometimes catch from a busier world the echoes of an accusation that the Universities of Canada are becoming 'nurseries of anarchy and revolution'. So far as such charges have any basis except hysteria, they may serve to encourage us, for they seem to indicate that students are in some measure acquiring the art of looking at both sides of disputed questions, an art in which it is our duty to encourage them. The ideal of suppressing enquiry and free speech, which has for the moment established a tragic dominance in many parts of the world, is nowhere more absurd than in a University, where men and women gather to exercise their faculties of curiosity and logic. Those faculties in them are necessarily immature; their utterances are often crudely dogmatic. But to stifle thought and utterance would be in a University the basest treason. As Penn said, 'Whoever is right, the persecutor must be wrong'."

"If we are to stimulate in our pupils objective thinking, we must be equally free in speech and thought ourselves—but not equally rash. Propaganda is no part of a teacher's proper function. He is not concerned to produce opinion, a temporary state of conviction which can be quickly changed by counter-propaganda. His aim is to stimulate the growth of intelligence, the power of detached judgment. To that end he may exercise in the class-room every art of sophistry, but if he blinks his way into the outer world, where opinions clash unanchored both from fact and reason, it behoves him to remember what astonishing weight that world attaches to a professorial pronouncement. The dignity of the University stalks beside him on the platform, sternly demanding judicial sobriety. A University teacher should certainly be clever; he needs to be wise; and of the factors of wisdom not the least are self-restraint and kindness and patience."

### Appoint Commission

#### To Inquire Into Claims Of Alberta For Further Resources Compensation

Hon. Andrew K. Dysart, judge of the Manitoba court of king's bench; Hon. Thomas M. Tweedie, judge of the supreme court of Alberta, and George C. Macdonald, Montreal, have been constituted a commission to inquire into claims of the province of Alberta for further compensation with respect to the administration and control of its natural resources. Announcement of the appointment was officially published yesterday. Mr. Justice Dysart is chairman.

With the exception of Mr. Justice Tweedie the commission is the same as that which investigated similar claims on the part of Saskatchewan recently. On the completion of the Alberta report the commission will render to the federal government joint recommendations on behalf of both provinces.

### Chinese Form Of Torture

#### Used Skin Of Rhinoceros To Crush Political Prisoners

The ancient Chinese had some strange uses for the rhinoceros, according to a report by an American archaeologist. One form of torture was to wrap a political prisoner in the hide of a freshly killed rhinoceros. As the hide dried it contracted and slowly crushed the victim. Another use the ancient Chinese had for rhinoceros skins was for covering funeral cars. Also the armour of the bronze-age warriors was made of it.

Once upon a time the good died young.

But since goodness became a virtually obsolete virtue, the careless have been dying young, instead.

Cigarettes in their modern form were introduced into America and Europe about 65 years ago.

## Change of Climate, Diet, Water Often the Cause of Diarrhoea

If you are suddenly attacked with Diarrhoea, Dysentery, Colic, Cramps, Pains in the Stomach, Summer Complaint or any Looseness of the Bowels, do not waste valuable time, but get a bottle of Dr. Fowler's Extract of Wild Strawberry and see how quickly it will relieve you.

This bowel complaint remedy has been on the market for the past 48 years. Proof enough that you are not experimenting with some new and untried medicine.

Do not accept a substitute. Get "Dr. Fowler's" when you ask for it, and be on the safe side.

Put up only by The T. Millburn Co., Ltd., Toronto, Ont.

### Gold Pouring Into London

#### Great Increase In Foreign Deposits Of Precious Metal

The golden tide, unexampled in the history of the world's monetary movements, continues to pour into London.

It began a year ago with a gold influx at the rate of \$25,000,000 weekly, then it increased early this year to \$62,000,000 weekly, and now it averages 45 millions weekly and shows no indication of declining. As soon as gold arrives in England from South Africa, Canada and other producing countries, it is bought by French, German, Dutch and American buyers, nervous about the financial state of affairs in their own countries, and stored away uselessly in the vaults of London banks, where they know it cannot be touched. Already in the square mile that constitutes the city of London more precious metal has accumulated than ever King Solomon's legendary mines contained. The latest figures, covering a period of nine months, show gold importations valued at \$1,000,200,000. Exports reached less than \$500,000,000. Altogether, at the moment one billion and a half of foreign gold is stored in the city banks—a figure which exceeds any previous records in peace time.

Bankers do not want this gold; they cannot use it either to provide credits for industry or work for Britain's unemployed. Moreover, any fresh financial upheaval in Europe might cause its flight from London, with disastrous effects on sterling's international stability. Its uselessness is further emphasized by the fact that, although London's vaults are bursting with it, the official government figures reveal that the British people's purchasing power in the way of wages and salaries has been decreased through an economy campaign by \$310,000,000 since the gold crisis of 1931.

### Solo Climber Lost Life

#### Former British Army Captain Attempted Ascent Of Mount Everest

A solo climb of Mount Everest would be the limit in human daring. It is the sort of unbridled audacity which the Greeks thought allied to sacrifice and which the gods invariably punished. The penalty has been meted out to Maurice Wilson, the former British army captain who set out to walk up a mountain which organized expeditions have failed to conquer. It was his theory that these Everest attempts had failed because of overelaboration, in which he may have been right.

Mr. Wilson did not count on making use of ropes and tracks left by the Rutledge expedition last year, so that in the strictest sense he was something more than a one-man expedition. But when all is said and done, he obviously belonged to the new school of mountaineering which has sprung up since the war and which has transformed a sport into a gamble with death. The new climbers have performed feats which older Alpinists would not dream of attempting, but they have done it at an enormous cost of life.—New York Times.

### To Salvage Treasure

#### Nineteen Gallions Sunk In 1702 To Be Searched For Gold

The 19 gallions of the Franco-Spanish fleet sunk in the Bay of Vigo in September, 1702, by the combined British and Dutch fleets, under Sir George Rooke and the Duke of Ormonde, will be searched for gold this summer, the Madrid newspaper El Debate reported.

Several previous attempts to salvage the treasure brought by the fleet from the West Indies were fruitless.

### Glass Is Latest Vogue

Glass and steel are the vogue for modern homes in England this season. Glass what-nots and chromitubed easy chairs are among the most popular pieces. Glass beds are coming into style. Steel drawing rooms and glass bedrooms are considered the latest in human habitation.

The principal European countries, notably France, Italy, and Germany, have stringently controlled the imports of dairy products during the past few years by tariffs, quotas, and other means. This has resulted in a steady increase in the quantities of butter and cheese exported to the United Kingdom.

Canadian production of timothy seed is less than one half of domestic requirements, as indicated by importation statistics, while substantial export surpluses of alfalfa, sweet clover, and Canada blue grass are usually produced yearly.

## PLUG SMOKING TOBACCO

For real economy and enjoyment, smoke plug tobacco. The tobacco stays fresher, because you cut each pipeful as you need it... coarse or flaky, to suit yourself. And, it lasts longer in your pipe!

### Building More Ships

#### Britain Still Maintaining Her Role Of The Sea

What may be taken as a sign of a world trend toward prosperity is the fact that on June 30 last, compared with the same date last year, there was a 70 per cent. increase in the tonnage of the merchant ships under construction in the yards of all nations, except Russia, about which Lloyd's had no official information. Since June, 1933, there has been increased activity in most shipyards and compared with the report on March 31, it is still on the upgrade though the augment of new tonnage was only 1 per cent.

Great Britain and Ireland, which are taken together, still lead the way. The only notable gain over the last quarter was that shown in their reports. They are building five of the ships of 20,000 tons or more, the sixth being under construction in France. Two of the large British ships were started last quarter.

The British yards are now building 48.3 per cent. of all merchant tonnage, namely, 587,142 tons out of the 1,216,340 under construction. The British increase was 305,702 tons over last quarter. To appreciate Britain's position we have only to compare it with Japan's, which is next in line. Japan's total tonnage on June 30 was 137,280, less than a fourth of Britain's total, and Japan's increase was 14,000 tons, less than a seventh Britain's increase.

France comes next. In line, then Germany, Denmark, Holland, Sweden, Italy, the United States and Spain, in the order named. The only two nations which showed less shipbuilding activity were Italy and Spain. The United States moved up from tenth to ninth place, though its increase was only 247 tons. It is evident that British merchant shipping is maintaining its role of the sea.

### A Million In Time

#### World War Lasted About Two Million Minutes

A way of realizing the meaning of a million is to think of what it means in time. Few people realize that there are less than a million days in the whole Christian Era; in fact, if we count back a million days from 1933, we come to a date well before the founding of Rome, while a million hours would take us back to the Battle of Trafalgar. The Great War lasted about two million minutes, and, taking the total casualties as ten millions, this gives an average of five casualties per minute throughout the period of hostilities.

The movement of sheep and lambs in Canada from farms to livestock yards and packers showed a substantial increase during 1933 and was well above the five-year average, 1929-1933.

Logging camps and other woods operations form an important outlet for Canadian canned and dried fruits.

In 1933 a total of 398,300 acres were sown to buckwheat in Canada and production amounted to 8,453,000 bushels.

### King George's Silver Jubilee

#### Celebration Will Be Held In May Of Next Year

The Irish Free State has declined to send a representative to participate in next year's celebration of the silver jubilee of King George's accession, it was revealed in the House of Commons.

The revelation was made by Acting-Premier Stanley Baldwin who announced the celebration would be held May 6 to 18 and the 25th anniversary of accession would be observed as a public holiday throughout the nation.

Mr. Baldwin said prime ministers of Canada, Australia, New Zealand and South Africa had welcomed with warmth the suggestion they take part in the ceremonies at London, although it was impossible to tell at the moment if they would be able to be present owing to possibility of political developments keeping them at home.

The acting-premier said also the government hoped to hold informal conversations with the premiers regarding important empire questions, taking advantage of their presence in London.

The Irish refusal of the invitation was decided by President Eamon de Valera and his executive on the grounds attendance was not possible under present conditions, a statement presumed to mean the Free State did not wish to take part in view of differences between it and the United Kingdom over land annuities and the consequent economic "war".

Feature of the celebration will be a thanksgiving service which their Majesties will attend at St. Paul's cathedral and similar services in other parts of the country.

### Home For Quintuplets

#### New Home To Be Built In Little Northern Ontario Town

Sometime between now and when the early winter snow begins to fly in this little northern Ontario town, the Dionne quintuplets, their five brothers and sisters and their parents will be housed in a comfortable, modern residence.

Through the aid of the Canadian Red Cross, and with assistance also from officials of the northern Ontario relief commission, it was learned recently, plans will be far enough advanced in a few days to allow architect, contractor and workmen to begin their tasks in earnest.

### Has Given Good Service

#### Denver Man Still Driving Roadster Bought In 1910

C. C. Dill, a Denver roofing contractor, estimates that he has got 400,000 miles out of his 1908 roadster. He bought the machine in 1910, after it had been driven about 2,000 miles. In 1915 the speedometer gave up and he stopped at 24,000 miles. Since then he has been driving it steadily, from coast to coast and from the Great Lakes to Alabama. Not once has it been involved in an accident or brought its owner into difficulties with the law.

The Christian Science folk built a new publishing house in Boston during the years of depression, paid \$4,000,000 for it in cash and never held a garden party or a church supper.

When a lion's tail becomes motionless, it is a signal that he is angry and about to attack, according to trainers.

Draught-proof curtains, brought together by a zipper tassel, have appeared in London.

Red raspberries are the hardest of the brambles.

### Secret Method Revealed

#### How Scotland Yard Determines Age Of Finger Prints

Scotland Yard's secret method of telling the age of finger prints was revealed in Sessions Court in London during the trial recently of John C. O'Connor, charged with breaking into the Lady Margaret Day Nursery. Evidence against him was a thumb-print found on a clock, but O'Connor said he had only handled the timepiece in 1932. Detective-Sergeant Jack Livings, of New Scotland Yard, said he had no doubt the fingerprint was that of O'Connor. He added: "The powder we apply to latent impressions to bring them out will stick to the ridges of a new print, but an old one is dry and the powder will not adhere to it. A fresh print can easily be removed by a duster, but a stale one can only be removed by a damp cloth."

### Education In Russia

#### Stalin Orders Secondary Schools To Raise Standards Again

Stalin's latest decree that the secondary schools of the Soviet Union must, in some degree at least, return to the standards and methods of the rest of Europe adds another paragraph to a new and more hopeful chapter in an old and rather sorry story. The story is that of the failure of an experiment, which, like so many other things in modern Russia, looked very handsome on paper, but which has proved to be quite beyond realization in actual practice.—Glasgow Herald.

### Always Good Neighbors

#### Canada And United States Like To Exchange Courtesies

That was a friendly and fine gesture when the Americans brought back the maple which they took away from the old Upper Canada parliament back in 1812. To many, it may seem a little thing, yet it is just the sort of little thing that makes for friendliness and good feeling between two countries. It is the sort of thing, indeed, which, occurring every now and then, has made Canada and the United States almost model neighbors.—Ottawa Journal.

Both the production and consumption of oats in Canada have followed a downward trend since 1920.

### "It Helps Me!"

"That's what 98 out of 100 women say after taking this medicine. It quiets quivering nerves, gives them more strength before and after childbirth, rides them over Change of Life... makes life seem worth living again."

EDNA ROBB WEBSTER

Author of "Joretta," "Lipstick  
Girl" Etc.

**SYNOPSIS**

Camilla Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job. Others in the story are Avis Werth, another wealthy girl who is trying to win Peter, Sylvia Todd, Peter's model, and Gus Matson, his former roommate with whom he has quarrelled. After a party at an exclusive club, when the rest of the members of the party go to a cabaret to continue the gaiety, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and they quarrel. After Camilla has gone from the studio, Avis Werth calls and persuades Peter to accept a loan of \$1,000. Peter finishes his exhibit and asks Avis and Camilla for suggestions as to a name for it. Camilla suggests "Eager Youth," and Avis "Inspiration." Peter adopts the latter title and Camilla, heartless, goes to Peter's studio for quiet and to think. Peter and Avis follow later, and as the lights are turned on, see the statue has been shattered to pieces. Avis accuses Camilla of doing this, and Camilla, stunned by the disaster and hurt and horrified by the accusation, faints.

At Camilla's suggestion, Peter enters as his exhibit a statue he had sculptured especially for her as a wedding gift. They named it "Land of Hope."

Camilla's advertising campaign was a success from the beginning, and it was arranged to have three radio casts, in addition to newspaper advertising. Camilla to both write the Tiny Tots stories and to deliver them over the radio.

Peter's exhibit was awarded the Paris scholarship, and he prepares for his journey to Europe.

(Now Go On With The Story)

**CHAPTER LV.**

Camilla powdered her nose and drew her hat over her head at a part angle, but her movements were mechanical. She was thinking neither about her nose nor the angle of her hat. Her hands trembled a little, with excitement and apprehension. In another half hour, she would be speaking into the microphone to—thousands, perhaps. There also was a possibility that she would be speaking to no one, except Peter. She laughed shakily at the thought. All that effort and anxiety and expense, just to speak to Peter!

But she knew that would not be true. The response to her Tiny Tots had been too convincing of her public's interest, and the advertising of her radio programs too thorough, to deny her an audience. She envisioned that audience now, vaguely, reaching far out into limitless space, instead of her own chic figure in the dressing room mirror at the office. Her new autumn ensemble of transparent black velvet was set off by a smartly tailored white satin blouse, a white-trimmed purse and a perky white bow on the snug black velvet hat perched jauntily on the back of her black curls.

She joined Mr. Bowman in the outer office, who was going with her to the studio to introduce her to that important client of the firm, Mr. Alexander Hoyt.

Even in her trepidation, she had

**It will be delicious with**

**WONDER PAPER**

It dissolves as it cleans—as it polishes.

**Appleford PAPER PRODUCTS**  
HAMILTON, ONTARIO

W. N. U. 2058

to smile a little to herself when she anticipated that formal meeting with the man whom she had known as "dad" all her life. It might not be quite fair of her to surprise him like this, but she thought she deserved the right to make of it an important event. The circumstances had warranted it, she believed.

Mr. Bowman's car was waiting at the curb to whisk them away with a sense of importance. It had been a long time since Camilla had ridden behind a liveried chauffeur. She would never have supposed that last time, the next event would be a manifestation of her success in her beloved work, and so soon.

Arrived at the towering building on the top of which was the broadcasting station, an elevator whisked them upward and deposited them in a large, handsomely appointed reception room where a girl at the switchboard announced them. The program manager, Mr. Ritchie, appeared presently and greeted Camilla with deferent graciousness.

"You must get acquainted around here and make yourself at home, if you are going to be one of our regular visitors," he told her pleasantly. "You will broadcast from studio A, so we'll go right in now. Mr. Hoyt has not yet arrived, but I expect him any minute."

They passed through several rooms into a spacious, high-ceilinged room, carpeted, heavy velvet hangings at the high arched windows. Two concert grand pianos made little impression in the room's size, other musical instruments stood about, including a little old-fashioned organ; a few chairs.

A half dozen microphones were suspended from the ceiling. Camilla had been there before, to try out her voice; at that she had been surprised that the "mikes" were not like those one saw erected before public speakers stood outside the studio. They were long, black tube-like cylinders with a small porous circular pendant into which one spoke directly. She had learned then that papers rustled or slipped together caused "lightning" over the air, and various other facts concerning the marvel of radio broadcasting.

They had just been seated when a studio attendant ushered in Mr. Hoyt. Even before he crossed the room to them, he recognized Camilla, and his reserved smile of greeting was puzzled.

"Hello, Camilla. I didn't expect to see you here. Did you come to watch the broadcasting?"

Mr. Ritchie looked from one to the other, as puzzled as was Alexander Hoyt.

"You know Mrs. Anson, Mr. Hoyt? She is here to do the broadcasting. She is your very capable advertising artist, the creator of the Tiny Tots."

Camilla's smile applied to her foster father for all that she could not express in words: her forgiveness for this secrecy and the importance of her responsibility to his venture.

"Why—of course, I know Mrs. Anson—my Camilla—can it be possible?" He was speechless, but that twinkle of pleasure that she remembered so well gleamed in his eyes before a suspicious mistiness clouded them. He took her hand quietly. "My heartiest congratulations, Camilla."

As he said, but to Camilla it was like an oration of commendation, knowing the man as she did.

There were a few moments of comment and explanation and then the room began to stir with other artists, people coming and going, orchestra instruments being tuned, an atmosphere of waiting excitement. A huge clock on one side of the room, with a long, impatient second hand, measured off the passing time rapidly.

Lights flashed on a signal board. Finally, double sound-proof doors were closed, everyone was in his place to avoid the least fractional second of delay. Camilla thrilled to this new experience of being a part of that vast organization of education and amusement that flooded the air all over the world from these perfectly regulated units.

A red light flashed above the letter A of the signal board, and the voice of the station announcer began his introduction to the Wheathearts Cereal program. The orchestra followed instantly with a gay selection. Mr. Ritchie introduced Mr. Hoyt briefly and he, in turn, presented Camilla. His audience, the occupants of that room could have been no more astonished than was Camilla herself when he said:

"Boys and girls, I am not only going to introduce to you the creator of the Tiny Tots, but I am going to pass on to you a lovely surprise which I had just a few minutes ago when I met Miss Camilla. You have not known who first thought of the Tiny Tots and neither have I, before this afternoon. Imagine my surprise to discover that it was my

own little girl, grown up and working for me and for you, and all the time I did not know it. I knew that she was working somewhere with art work, but I never knew until now that she was bringing Tiny Tots to life for your entertainment and happiness. I wish I might tell all of you what a splendid and beautiful little girl she is, for I know you would love her as much as I do. And now, I am going to let her tell you the first adventure of her little people over the radio. Miss Anson."

Camilla never knew quite how she managed to control her voice after that comment. Fortunately, she had written out her story so that she could refer to it in emergency, which gave her a sense of security, and she managed to get through the ordeal somehow. Her voice gained confidence and clarity as she continued, and her story proved to be timed to the second for the eighteen minutes allotted her. She returned to her chair with a feeling of weak exhaustion, wondering if she had been a failure. But Mr. Ritchie smiled reassuringly and whispered, "Splendid," under cover of the music which followed.

Finally, then, it was over and Camilla passed through the opened doors, feeling as if she had been on a strange journey to another world. Mr. Hoyt took her arm affectionately.

"I can't tell you how proud I am, Camilla, nor how much I appreciate what you have done for me. Your mother will be immensely pleased, too. Can't you come out to dinner with us to-night? We haven't seen much of you these days. And, no wonder," he added with a shy twisted smile.

"Sorry, but I can't to-night, dad. You know, Peter leaves day after tomorrow for New York to sail on the sixteenth. But I shall be seeing you more often when he is gone, I promise. I've been terribly busy and it doesn't look like I am going to be less busy very soon. I do want to talk with you about—everything, and I'd like to have some co-operation on some of my ideas hereafter. It's been—"

she stopped a little breathlessly, "rather a struggle, to make it go all alone."

"You are wonderful," he said simply, "and we are proud of Peter, also. So glad that he won the scholarship, but I wonder what you are going to do without him."

"Just work—and wait for him," she laughed.

A boy interrupted them. "Telephone for Miss Anson, please. Over here, he directed."

Camilla wondered who could be calling her there, excused herself from the group.

"Dear, you were marvelous," Peter's voice replied to her hesitant, "Hello."

"Who in the world but you, darling, would think of calling me be-

fore I left here?" she exclaimed joyously.

"Thought I better catch you while I could. How do I know where you may be going next? A famous wife is the most elusive thing I can imagine, and I'm going to have to spend myself up to, keep up with her."

"Honestly, Peter, did my voice sound—all right?"

"Perfect—wonderful. I'll bet your fan mail day after to-morrow snows you under."

She laughed happily. "Thanks, dearest, I'll meet you in an hour, then, as I promised."

"I called because I was afraid you would forget."

"As if I could!" Camilla replied, manded him fondly.

**Proved By Experiments**

Earth's Motion Interferes With Laws Of Gravity

If you make a deep hole in the earth you can't drop anything to the bottom, because the earth moves on and the side of the hole stops the falling object. This has been proved by experiments in the deep shafts of the American copper mines. Tools dropped from the mouth of a shaft were not found at the bottom but were against the side of the shaft, and this led the Michigan College of Mines to make experiments. The object being to discover how far the earth's motion interfered with the usual effect of the laws of gravity. The tests employed included suspending marbles by threads just below the mouth of the shaft, the threads were then burnt by the flame of a candle and the marbles allowed to fall. Investigations showed that after dropping some 500 feet the marbles in all cases came to rest on the east wall of the mine.

**THE RHYMING OPTIMIST**

By Aline Michaelis

**EGYPT AND THE NILE**

Egypt and the Nile,  
Long I dreamed of these,  
Where the Sphinx's smile  
Mocks the centuries.  
Strange, how gods that died,  
Thoth, Osiris, Set,  
By that tawny tide  
Color all life yet.

From the sacred hall  
Where the mummies stand  
Still their shadows fall  
Over all the land.  
Pharaohs wise and just  
Lie with golden masks  
Glittering over dust,  
Done with all their tasks.

Egypt and the Nile,  
Gods like bird and beast,  
Cleopatra's smile,  
Pyramid and priest;  
Gods like hawk and snake,  
Shrines where blood must spill;  
Strange, how they awake  
Stirring fancies still!

Squeak Was Missing

Following a speech in New Guinea by a British missionary, whose footwear was old and squeaky, Papuan natives started a boot fashion, and staged a rush for "white man's boots" at the local store. The next day they stormed the place and complained of a lack of squeak. The merchant hurriedly substituted cheaper boots.

A British company will operate a chain of plants to extract motor fuel from coal.

**Still Hold Ancient Rites**

Indians In North Cling To Old Religious Customs

Christianizing of some 6,000 Indians in Saskatchewan is rapidly going ahead, but in the wigwam encampments which dot the northern tundra ancient religious rites are still practiced. Ven. Archbishop W. E. J. Paul, head of Indian work in the Anglican diocese of Saskatchewan, stated before the Historical Society at Prince Albert.

Up where the northern lights spread their phantom signals across the sky the Indians still observe the "sacrifice of the white dog," marry according to age-old customs and hold the ancient sun dance and ghost dance. The nearly-forgotten medicine man is a power in some Indian communities and still heals the natives with herbs, the churchman said.

Archdeacon Paul believed there was no doubt but what the Indians were better off in the old tepee life than living in ill-ventilated shacks as many of them do who stay near civilization.

There are times when an Indian merely goes through the ceremony of a feast to take a wife. On some reservations there is a rare case of polygamy and casual exchange of wives. This, however, is being discouraged by missionaries.

In some parts of Saskatchewan the ceremony of the "White Dog" is intended to wash away sin, is still practiced. The "Sun Dance," a tortuous reservation which used to last three days, is held periodically but it has been cut to 24 hours without the torture.

Archdeacon Paul said while sleeping in an Indian tepee last year he was awakened throughout the night by the constant beating of the tom-toms. Even the "Ghost Dance" for the dead and the "Give-Away Dance" whereby Indians hope to get back all they gave away, are still sometimes held. These two rituals have been banned by the Indian department.

**Safety Minded**

Organization For The Prevention Of Accidents In Industry

The fact that there is an organization set up and operated solely for the prevention of accidents in industry should be sufficient to emphasize in the public mind the importance of the work it has undertaken, and should encourage all individuals to co-operate in achieving the aims to which it aspires. When one realizes, as has been pointed out, that at least 85 per cent. of all industrial accidents are preventable, it is easy to conclude that the painful toll could be quickly and drastically reduced if the people as a whole were to become safety-minded.—St. John Telegraph-Journal.

**Farm Implement Sales**

Sales of farm implements in Canada are one-third greater this year than in the first six months of 1933, and there is every indication that they will continue to increase, according to the sales manager of one of the leading companies. In some parts of the west there is a 50 per cent. increase and the outlook for the immediate future is brighter.

Natives of the Far East still consume acorns; they are baked, shelled, ground and cooked like bread.

**Little Helps For This Week**

"The shadow of a great rock in a weary land." Isaiah 32:2.

"In returning and rest shall ye be saved; in quietness and confidence shall be your strength." Isaiah 30:15.

O shadow in a sultry land We gather to Thy breast, Whose love enfolding like the night, Brings quietude and rest.

Strive to see God in all things and acquiesce in His will with absolute submission. Do everything for God, uniting yourself with Him by a mere upward glance, or by the overflowing of your heart toward Him. Never be in a hurry, do everything quietly and in a calm spirit. Do not lose your inward peace for anything whatsoever, even if your whole world seems to be upset. Commend all to God, and whatever happens abide steadfast in a determination to cling closely to Him, trusting to His eternal love for you, and if you find you have wandered forth from this shelter recall your heart quietly and simply. Do not smother your yearning with a host of cares, wishes or longings, under any pretext.—Francis De Sales.

It is to those whom we call fanatics that we owe practically every step that has been made in our slow journey toward a better world, states Dr. J. L. Biggar, Canadian Red Cross Society.

The New York stock exchange has 70,000 miles of telephone and telegraph wires.

**Dr. Wernet's Powder For FALSE TEETH**

A Joy To All Users

Can't Slip or Slide

Sprinkle on Dr. Wernet's Powder and you won't have to think about your false teeth all day long. Joyous comfort is yours. Eat anything you want—it holds plates firmly in place—positively can't slip or slide. Forms protective cushion for sensitive gums. Leaves no colored, gummy substance—keeps mouth sanitary, breath pleasant. Prescribed by world's most noted dentists. The cost is small—the comfort great. Any drugist.

Believes U. S. Must  
Purchase 100,000,000  
Bushels Canada WheatAdvices Farmers Not To  
Rush Wheat To  
Market

By G. C. PORTER

WINNIPEG, Aug. 4.—"I believe the United States will have to buy probably 100,000,000 bushels of Canadian wheat before next year's harvest."

This is the considered opinion of Bruce McBean, a veteran member of the Winnipeg Grain Exchange with wide experience. He has just completed a three weeks' personal tour by auto through the wheat belt of Canada.

"The time has come," he explained, "when an approximate idea can be reached as to just where the world is at in the matter of grain production and particularly as to the position of Canadian yield."

"Since the last days of July there has been unquestionably heavy deterioration in all northern countries and very heavy losses in the spring wheat territory of North America."

**Premature Ripening**  
"A large proportion of the crop in Western Canada is yet in the milk or soft dough stage and in large areas wheat has been forced into premature ripening. Grasshoppers are still eating into the infested areas south of the C. P. R. main line."

"A preliminary estimate of a yield approximating 260,000,000 bushels made a week ago after my inspection tour, I now think is more likely to have to be revised downward, than upward."

"Heavy losses suffered by the U. S. growers means of course that the United States will have to import some one hundred million bushels of Canadian surplus. This fact, combined with the needs of Europe, leads inevitably to the conclusion that the Canadian surplus and carry over will vanish during the 1934-35 crop year."

"I do not hesitate to advise farmers not to rush their wheat to market, now that threshing is approaching. They should only sell now for their immediate requirements and hold the balance on the farm. I am satisfied they will obtain \$1 per bushel for all their holdings before July 1, 1935. The feed grain crops, especially oats are very light in the Canadian west."

Sask. Premier Unveils  
Tablet To His Brothers

EPETER, Ont., Aug. 6.—Saskatchewan's newly elected premier, Hon. James G. Gardiner, here on a visit to his mother, Mrs. James Gardiner, was the outstanding figure at Thomas Road United Church, Sunday morning, when he unveiled a memorial tablet to his brothers Earl and Edwin, killed in the Great War.

Mr. Gardiner paid tribute to his deceased brothers and extended his sympathy to mothers who had sons killed in action.

The only real cure for the present world-wide unrest lay he said, in the nations following the teachings of the sermon on the mount, and no longer seeking an eye for an eye and a tooth for a tooth. Mr. Gardiner touched on the depressions of the 80s and 90s of the past century, and also referred to the present one.

He believed the cutting off of supplies during the war led nations to produce their own requirements within their borders. This, he said, caused a falling off in trade, and particularly affected Canada, previously a large exporter of food stuffs.

## W. I. Meeting

The August meeting of the Women's Institute was held at Mrs. Mac's home. Mrs. Mac was assisted by Mrs. Milligan and Mrs. Otto. Among the items of business for the afternoon were donations of \$15 to School Fair and \$25 to Cerebral Hospital. A resolution to the effect that this Institute go on record as being in favor of the Social Credit system was passed. When all business was concluded Mrs. W. I. Davis took charge of the program on "child welfare and public health."

A piano duet and an encore by Mrs. Roberts and Mr. McKenzie and Audrey Kideout were well received. A paper on child welfare was given by Mrs. W. I. Milligan, an article on the same subject was read by Mrs. Kideout. Then Mrs. Davis gave a most interesting account of some of her observations and experiences while at the Mayo clinic at Rochester, Minn. Miss Margaret Davis recited a little poem. The roll call was answered by suggestions for school lunches. There will be no meeting in Sept. as the conference is being held in Youngstown September 6th.

Coast Doctor May  
Recover From Wounds

VANCOUVER, Aug. 6.—Dr. A. P. Proctor, 65, medical officer here of the Canadian Pacific Railway, was maintaining an impressive today, strengthening his legs for his recovery from a bullet wound in the abdomen.

The condition of Timothy A. Sargood, locomotive fireman of Revelstoke, B. C., who, police state, shot Dr. Proctor in the latter's office after brooding over a fancied grievance, remained poor. Sargood shot himself in the head after shooting at the physician.

## Here and There

The Open Dominion championship match in the Dominion Marksmen's revolver competition was recently by the Canadian Pacific Railway Ontario police team with a score of 1435 points out of a possible 1500. It C. M. P. division and provincial police also competed.

Plans for the midland festivals of Western Canada during the coming year with a tentative discussion of policies for the next two seasons, were featured at a meeting of delegates of Western Competition Festivals recently at the Palliser Hotel, Calgary.

John Jacob Astor and his bride have decided to extend their honeymoon tour to the Canadian Rockies and British Columbia. "We intend to stop over at Lake Louise," said the young millionaire, "and then move on to Vancouver, taking in the sights on the way."

Captain R. G. Latta, skipper of the "Empress of Britain" and commodore of the Canadian Pacific fleet, retired from active duty recently. He was succeeded as the bridge of the Britannia by Captain R. N. Stuart, V.C., D.S.O., U.S.N.C., R.N.R., Captain Stuart was promoted to the post of commodore of the Canadian Pacific fleet.

Indicating the trend towards greater production and recovery of business, substantial increase in the second quarter of 1934 as compared with the corresponding period of 1933 is shown in the recently published production figures of Consolidated Mining and Smelting, one of world's greatest mining companies.

Driving a highly decorated locomotive into the Canadian Pacific Railway depot at the end of the Calgary-Edmonton run recently, A. N. Hobkirk, veteran engineer, completed 43 years of continuous service with the railway, most of it at the throttle of an engine. "I have always liked my work and I hate to quit," said Mr. Hobkirk.

Founded June 13, 1874, by George and Catherine Beatty and with agencies, warehouse, offices or depots across Canada, New Zealand, the United Kingdom and fifty other countries, the national and world-wide exporting house of Beatty Bros., manufacturers of washing machines and firm implementers, celebrated its Diamond Jubilee at Pergus, C.T., last month.

John F. Sweeting, industrial commissioner of the Canadian Pacific Railway, states in an official publication of the railway that there is a decidedly firm tone of confidence in the West and increased activity in many industries, with the tourist business promising to be better at all resorts this year.

An increase of \$77,590 lbs. in the Nova Scotia lobster catch during the month of May was instrumental in raising the landed values \$23,483 over the same month in 1933, according to an announcement by the Department of Fisheries on June 28th.

Remarkably vigorous tomato plants have been grown out of doors at Fairbanks, Alaska, under continuous daylight of six weeks, despite the report that daily artificial and daylight exposures of 17 hours or more are injurious to tomatoes.

Canadian butter found a ready outlet on the Scottish market last year, although the season was far advanced before the Canadian butter made its appearance.

## PROVINCIAL SEED FAIR

Preparations are now being made for the annual provincial seed fair which will be held this year in Calgary, from February 14 to 17 inclusive, under the direction of the provincial field crops branch. Approximately 42,000 will be given in prizes and some 500 exhibits of seed grains and grasses are expected. The class for new exhibitors, which was inaugurated two years ago will be continued. The classes for junior club members will again be a big feature, more than 500 samples being already entered for these classes. Special attention is being given to the minor crops division, particularly to forage crops and to garden and canning peas. Eight classes are provided in corn, in which the prizes total about \$300. A championship prize of \$25 in oats is being offered by the Peace River Co-operative Association, and a champion prize in malting barley is being offered by the Canada Mailing Co.

## FASHIONS, FADS, FOIBLES

Printed silks are leaders among the season's new fabrics. The figures of pattern are not too large; but are bright, and set against dark backgrounds. Black backgrounds are cool for the larger woman; for her, the figures should be quite small, if any.

Shoulder wings, or tiny capes emphasize the upper arm, which is an important fashion item. Cow neck lines are popular. At last, flounces have returned to the lower edge of the skirt, but they are finely pleated, not ruffled.

This is a good way to lengthen a dress which is too short for the present style.

Soft powder-blue, happy greens, rich browns, gold and navy, and ever-popular black are among spring colors; but the favorite of all, judging by smart shop windows, is navy blue. This flattering color is slated for a very strong come-back, and there is nothing more all-round beautiful and serviceable.

Plain fronts and trimmed fancy backs is the rule for evening and afternoon dresses. The back is made or semi-nude in formals, while in daytime dresses there are drapes, ties, pan is and other interesting features above the waist-line in the back.
